INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference	FOR FURTHER ACTION See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416)	
International application No. PCT/US00/17266	International filing date (<i>day/month/year</i>) 23 JUNE 2000	Priority date (<i>day/month/year</i>) 25 JUNE 1999
International Patent Classification (IPC) or national classification and IPC IPC(7): H04N 7/173 and US Cl.: 725/87		
Applicant DISCOVERY COMMUNICATIONS INC.		

1.	This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.
2.	This REPORT consists of a total of <u>5</u> sheets. <input type="checkbox"/> This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority. (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT). These annexes consist of a total of <u>0</u> sheets.
3.	This report contains indications relating to the following items: I <input checked="" type="checkbox"/> Basis of the report II <input type="checkbox"/> Priority III <input type="checkbox"/> Non-establishment of report with regard to novelty, inventive step or industrial applicability IV <input type="checkbox"/> Lack of unity of invention V <input checked="" type="checkbox"/> Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement VI <input type="checkbox"/> Certain documents cited VII <input type="checkbox"/> Certain defects in the international application VIII <input type="checkbox"/> Certain observations on the international application

Date of submission of the demand 25 JANUARY 2001	Date of completion of this report 18 APRIL 2003
Name and mailing address of the IPEA/US Commissioner of Patents and Trademarks Box PCT Washington, D.C. 20231 Facsimile No. (703) 305-3230	Authorized officer CHRISTOPHER GRANT  Telephone No. (703) 305-4765

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/US00/17266

I. Basis of the report1. With regard to the **elements** of the international application:*☒ the international application as originally filed☒ the description:pages 1-58, as originally filedpages NONE, filed with the demandpages NONE, filed with the letter of _____☒ the claims:pages 59-68, as originally filedpages NONE, as amended (together with any statement) under Article 19pages NONE, filed with the demandpages NONE, filed with the letter of _____☒ the drawings:pages 1-48, as originally filedpages NONE, filed with the demandpages NONE, filed with the letter of _____☒ the sequence listing part of the description:pages NONE, as originally filedpages NONE, filed with the demandpages NONE, filed with the letter of _____2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language _____ which is:

☐ the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).☐ the language of publication of the international application (under Rule 48.3(b)).☐ the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/or 55.3).3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:☐ contained in the international application in printed form.☐ filed together with the international application in computer readable form.☐ furnished subsequently to this Authority in written form.☐ furnished subsequently to this Authority in computer readable form.☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.4. ☒ The amendments have resulted in the cancellation of:☒ the description, pages NONE☒ the claims, Nos. NONE☒ the drawings, sheets/fig NONE5. ☐ This report has been drawn as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**

* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17).

**Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/US00/17266

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. statement**

Novelty (N)	Claims	(Please See supplemental sheet)	YES
	Claims	(Please See supplemental sheet)	NO
Inventive Step (IS)	Claims	(Please See supplemental sheet)	YES
	Claims	(Please See supplemental sheet)	NO
Industrial Applicability (IA)	Claims	(Please See supplemental sheet)	YES
	Claims	(Please See supplemental sheet)	NO

2. citations and explanations (Rule 70.7)

Claims 1-3, 5, 6, 8-13, 22-24, 26, 27, 29-34, 43, 45-49, 51, 53 and 54 lack novelty under PCT Article 33(2) as being anticipated by Huffman (WO 97/22112).

Considering claims 1, 8, 11, 22, 29, 32, 43 and 51, Huffman discloses an apparatus and corresponding method for providing text to speech conversion for an electronic book displayed on a viewer comprising:

- a) a display (130) that displays a page of an electronic book on a viewer (figure 3), the page including text (figure 7);
- b) a selection module (242, figure 12) that receives a selection of text on the displayed page for conversion to speech (page 19, lines 16-23);
- c) a conversion module (152, figure 3 or 42) that converts at least a portion of the selected text in to corresponding speech (page 12, lines 3-14) (see also figures 11, 14 and 15).

Claims 2-3, 9-10, 12-13, 23-24, 30-31, 33-34 and 45-46 are met by figure 11 and columns 16-19.

Claims 5, 26 and 49 are met by page 20, lines 6-24.

Claims 6, 27 and 53-54 are met by page 12, lines 3-18.

Claims 47-48 are met by figures 5, 6, 11, 15, 16 or 21.

Claims 7 and 28 lack an inventive step under PCT Article 33(3) as being obvious over Huffman (WO 97/22112) in view of Case (5,737,725).

Considering claims 7 and 28, Huffman (97/22112) discloses an apparatus and corresponding method for providing text to speech conversion for an electronic book displayed on a viewer comprising:

- a) a display (130) that displays a page of an electronic book on a viewer (figure 3), the page including text (figure 7);
- b) a selection module (242, figure 12) that receives a selection of text on the displayed page for the conversion to speech (page 19, lines 16-23);
- c) a conversion module (152, figure 3 or 42) that converts at least a portion of the selected text in to corresponding speech (page 12, lines 3-14) (see also figures 11, 14 and 15).

However, Huffman (97/22112) fails to specifically disclose (Continued on Supplemental Sheet.)

Continuation of: Boxes I - VIII

Sheet 10

V. 1. REASONED STATEMENTS:

The report as to Novelty was positive (YES) with respect to claims 4, 7, 14-21, 25, 28, 35-42, 44, 50, 52, 55-58.

The report as to Novelty was negative (NO) with respect to claims 1-3, 5, 6, 8-13, 22-24, 26, 27, 29-34, 43, 45-49, 51, 53, 54.

The report as to Inventive Step was positive (YES) with respect to claims NONE.

The report as to Inventive Step was negative (NO) with respect to claims 1-58.

The report as to Industrial Applicability was positive (YES) with respect to claims 1-58.

The report as to Industrial Applicability was negative (NO) with respect to claims NONE.

V. 2. REASONED STATEMENTS - CITATIONS AND EXPLANATIONS (Continued):

an audio access module that accesses an audio file as recited in the claims.

Case discloses an audio access module that accesses an audio file for the advantage of automatically generating audio or speech corresponding to text.

It would have been obvious to one of ordinary skill in the art to modify Huffman's (97/22112) system to include an audio access module that accesses an audio file, as taught by Case, for the advantage of automatically generating audio or speech corresponding to text.

Claims 4, 25, 44 and 52 lack an inventive step under PCT Article 33(3) as being obvious over Huffman (WO 97/22112) in view of Boulton (4985697).

Considering claims 25, 44 and 52, Huffman (97/22112) fails to specifically disclose permitting a user to request a definition of a word as recited in the claims.

Boulton discloses permitting a user to request a definition of a word for the advantage of providing a dictionary function to a user. See column 4, lines 11-16, the abstract and figures 1 and 16.

It would have been obvious to one of ordinary skill in the art to modify Huffman's (97/22112) system to include permitting a user to request a definition of a word, as taught by Boulton, for the advantage of providing a dictionary function to a user.

Claims 14-17, 35-38 and 50 lack an inventive step under PCT Article 33(3) as being obvious over Huffman (WO 97/22112) in view of Van Kleeck et al (Van Kleeck, 5,890,122).

Considering claims 14-17, 35-38 and 50, Huffman discloses an apparatus and corresponding method for receiving commands for executing functions to an electronic book displayed on a viewer comprising:

a) a display (130) that displays a page of an electronic book on a viewer (figure 3), the page including text (figure 7); b) a selection module (242, figure 12) that receives a selection of text on the displayed page for the conversion to speech (page 19, lines 16-23); and c) a conversion module (152, figure 3 or 42) that converts at least a portion of the selected text into corresponding speech (page 12, lines 3-14) (see also figures 11, 14 and 15).

However, Huffman fails to specifically disclose a receive module that receives an audible command, a conversion module that converts the audible command into a corresponding electronic signal and an execute module as recited in the claims.

Van Kleeck discloses an apparatus for receiving commands for executing functions comprising: (a) a receive module (506, 507) that receives an audible command (b) a conversion module (509) that converts the audible command into a corresponding electronic signal and (c) an execute module (510, 511) that executes a function for the advantage of providing voice control of an electronic apparatus (instead of manual key input commands).

It would have been obvious to one of ordinary skill in the art to modify Huffman's system to include a receive module that receives an audible command, a conversion module that converts the audible command into a corresponding electronic signal and an execute module, as taught by Van Kleeck, for the advantage of providing voice control of an electronic apparatus instead of manual key input commands.

Claims 18-19, 39-40 and 55-58 lack an inventive step under PCT Article 33(3) as being obvious over Huffman (WO 97/22112) in view of Vergo (EP 0 924,687 A2).

Considering claims 18-19, 39-40 and 55-58, Huffman discloses an apparatus and corresponding method for providing an electronic book displayed on a viewer comprising a display (130) that displays a page of an electronic book on a viewer (figure 3), the page including text (figure 7).

However, Huffman fails to specifically disclose a receive module that receives speech from a user, a commands module that converts the speech into corresponding electronic text and an insertion module that inserts the text into the electronic book as recited in the claims.

Vergo discloses an apparatus for performing dictation into an electronic book displayed on a viewer comprising a receive module that receives speech from a user, a commands module that converts the speech into corresponding electronic text and an insertion module that inserts the text into a device. This system provides efficient transcription from voice to text

Sheet 11

into an electronic device. See abstract and figure 3.

It would have been obvious to one of ordinary skill in the art to modify Huffman's system to include a receive module that receives speech from a user, a commands module that converts the speech into corresponding electronic text and an insertion module that inserts the text into the electronic book, as taught by Vergo, for the advantage of providing efficient transcription from voice to text into an electronic device.

Claims 20-21 and 41-42 lack an inventive step under PCT Article 33(3) as being obvious over Huffman (WO 97/22110) in view of Juang (EP 0 892,388 A1).

Considering claims 20-21 and 41-42, Huffman (97/22110) discloses an apparatus for restricting access to an electronic book for display on a viewer comprising: a store module (136, 154) that stores an electronic book for display on a viewer (figure 3).

However, Huffman (97/22110) fails to specifically disclose a receive module that receives audible command, a conversion module and an authorization module as recited in the claims.

Juang discloses a receive module that receives an audible command from a user, a conversion module that converts the audible command and an authorization module that provides authorization for the advantage of restricting access to an electronic device. See the abstract, figures 1-2 and page 2, lines 16-19.

It would have been obvious to one of ordinary skill in the art to modify Huffman's (97/22110) system to include a receive module that receives audible command, a conversion module and an authorization module, as taught by Juang, for the advantage of restricting access to an electronic device.
